TSO No. R4-2011-0126-A0X

**NOTICE OF PROPOSED ISSUANCE OF
AMENDED TIME SCHEDULE ORDER (TSO) FOR
WASTE DISCHARGE REQUIREMENTS
(National Pollutant Discharges Elimination System (NPDES) Permit)**

DISCHARGER	DISCHARGE LOCATION	RECEIVING WATER
Camarillo Sanitary District (Camarillo Water Reclamation Plant)	150 Howard Road Camarillo, California	Conejo Creek (tributary to Calleguas Creek)

Camarillo Sanitary District (hereinafter the Camarillo SD) discharges tertiary-treated wastewater, from its Camarillo Water Reclamation Plant (Camarillo WRP) into Conejo Creek, tributary to Calleguas Creek, waters of the United States. The discharge is regulated under waste discharge requirements contained in Order No. R4-2014-0062, adopted by this Regional Board on May 8, 2014, and by the Amended NPDES Order R4-2014-0062-A01, adopted by this Regional Board on July 9, 2015. Order No. R4-2014-0062-A01 serves as a permit under the National Pollutant Discharge Elimination System (NPDES No. CA0053597). On May 8, 2014, the Regional Water Board also amended Time Schedule Order (TSO) No. R4-2011-0126-A02, which prescribed Camarillo SD interim effluent limits for chloride, sulfate, and total dissolved solids (TDS). On December 14, 2015, the Regional Water Board amended the TSO to extend the deadline to December 31, 2017.

On September 7, 2017, Camarillo SD requested an extension of the time schedule for chloride, sulfate, and TDS, in TSO No. R4-2011-0126-A03 beyond the December 31, 2017 deadline; and subsequently submitted supporting documentation on October 9, 2017, regarding the changes to their capital improvement project.

On the basis of preliminary staff review and applicable law, the Executive Officer, pursuant to his delegated authority from the Regional Water Board, tentatively proposes to amend TSO No. R4-2011-0126-A03, by extending the time schedule for TDS, sulfate, and chloride to December 31, 2018. No changes to the NPDES permit are being proposed at this time.
